2025 Carbon Reduction Plan

ACHIEVING NET ZERO BY 2045

A.G. FLOORING LIMITED

2025 Carbon Reduction Plan
ACHIEVING NET ZERO BY 2045

Commitment to Achieving Net Zero

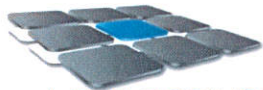

AG Flooring is committed to achieving Net Zero emissions by 2045.

Baseline Emissions Footprint

Baseline Year: 2021 (1/01/2021 - 31/12/2021)

The Carbon Reduction Plan has been completed in compliance with PPN 06/21. Our Carbon Emissions in 2021 were measured in line with GHG Protocol and include the greenhouse gases stated in the Kyoto Protocol.

Baseline year emissions: 2021		
EMISSIONS	TOTAL (tCO ₂ e)	
Scope 1	3.17	
Scope 2	1.14	
Scope 3	17.24	
Included Sources	Business Travel	0.00
	Employee Commuting	8.70
	Upstream transportation and distribution	1.27
	Downstream transportation and distribution	0.00
	Waste generated in operations	0.00
Total Emissions	21.54	

Current Emissions Reporting

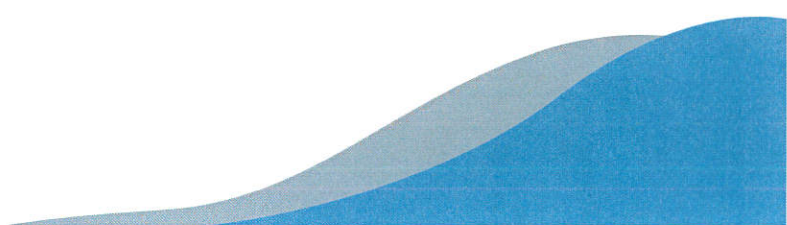

Reporting Year: 2024 (1/01/2024 – 31/12/2024)

The Carbon Reduction Plan has been completed in compliance with PPN 06/21. Our Carbon Emissions in 2024 were measured in line with GHG Protocol and include the greenhouse gases stated in the Kyoto Protocol.

Reporting year emissions: 2024		
EMISSIONS	TOTAL (tCO ₂ e)	
Scope 1	0.00	
Scope 2	1.14	
Scope 3	17.24	
Included Sources	Business Travel	7.28
	Employee Commuting	8.70
	Upstream transportation and distribution	1.27
	Downstream transportation and distribution	0.00
	Waste generated in operations	0.00
Total Emissions	18.38	

Reporting Period

A G Flooring Ltd will publish a Carbon Reduction Plan on a yearly basis detailing emissions released from UK Operations from 1st January to 31st December.

Baseline Year & Current Reporting Year

Due to 2021 being the first year we have measured our CO₂e emissions, the report for the Baseline Year and Current Reporting year contains different figures. Due to this, the explanations below apply to the current reporting year data only:

Scope 1

Scope 1 is reported as 0.00 tCO₂e in 2024 due to A G Flooring Ltd having no boilers, on-site manufacturing, or f-gases to report emissions on. Whilst we do have a fleet, this data is currently unavailable and therefore can't be reported on. We are looking to re-baseline in the future when we have adequate tracking software that will enable us to calculate the emissions caused by the fleet.

Scope 2

Within Scope 2, we have measured the emissions released from working from home and the consumption of purchased gas and electricity in office. With all of A G Flooring Ltd employees making the most of hybrid working, we have calculated 2 out of 5 days as spent working from home and the other 3 from the office. Heating, lighting and computer consumption have all been taken into account to calculate emissions released due to working from home.

Scope 3

The emissions resulting from employee commuting have been calculated at 17.24 tCO₂e, considering factors such as the distance travelled, mode of transportation, and average fuel consumption.

Business Travel

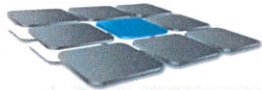

The emissions resulting from business travel, have been calculated. This includes travel by Rail, Bus, rental cars, and employee-owned vehicles for business purposes, excluding the commute to and from work.

Upstream and Downstream transportation and distribution

The emissions resulting from UPSTREAM have been assessed and quantified at 1.27 tCO₂e. This calculation considers the transportation activities involved in sourcing materials and delivering finished products, taking into account factors such as distance travelled, modes of transportation, and fuel consumption. We are currently looking to track our DOWNSTREAM TRANSPORTATION and distribution in more detail, however, we currently don't have these figures available. Consequently, the subsets in Scope 3 is reported as 0tCO₂e.

Waste generated in operations

As of now, A G Flooring does not have a waste removal provider. Therefore, we do not have access to specific data regarding CO₂e emissions related to waste disposal.

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to **9.19** tCO₂e by 2029. This is a reduction of **50%**

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2021 baseline.

- Reducing energy consumption - introduced smart heating systems in office building & use energy efficient appliances.
- Minimizing waste - use recycling schemes and reduce the use of single use plastics.
- Using sustainable material - through the use of eco friendly products and packaging, materials made from recycled products.
- Promote Green Transportation - encourage carpooling, cycling & using public transport.
- Employee training - Training employees on green practices, organizing green challenges, and rewarding eco-friendly behaviours.

A.G. FLOORING LIMITED

2025 Carbon Reduction Plan ACHIEVING NET ZERO BY 2045

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors.
